Jaime Ilustre
Full Stack Developer

I am a former business analyst with a finance background who transitioned to software development through a rigorous bootcamp, where I developed skills in JavaScript, TypeScript, the MERN stack (MongoDB, Express, React, Node), HTML, CSS, Git, and GitHub. I am eager to showcase my abilities and learn new programming languages in the tech industry.

WORK EXPERIENCE

Strategy Analyst
OTC FLOW

10/2022 - 01/2023   *Amsterdam, the Netherlands*

Achievements/Tasks

- Developed further insights into the biofuel market regarding the physical end product, feedstocks, and biofuel certificates/tickets within Europe and sharing any updates (regulatory and/or market trends) with our sales team.
- Developed business cases for new markets for our company to enter in, such as the Portuguese biofuel market and the Irish biofuel market.
- Oversaw the Dutch, UK, Portuguese, and Irish biofuel market and the European CSO (Compulsory Stock Obligations) market.
- Assisted in the onboarding of new colleagues by giving them a general introduction into the biofuel market.
- Reached out to counterparties in governing authorities to gather information that cannot be found online or in the respective legislation documents.
- Provided support to management with additional daily tasks.

Student Representative
Maastricht University School of Business and Economics

08/2018 - 02/2020   *Maastricht, the Netherlands*

Achievements/Tasks

- Assisted in events that were hosted by my faculty at the university, such as open days and introduction days.
- During open days, I had represented my bachelor programme to potential new students and their parents.
- During introduction days, I was assigned a group of new students to show them around the university campus and the city of Maastricht.
- In addition, I would introduce them to learning practices that the university utilises and answer any of their general questions regarding the university.

Brand Representative (Part-time)
Hollister & Co.

10/2018 - 09/2020   *Maastricht, the Netherlands*

Achievements/Tasks

- Helped customers with their shopping needs and assisted them in any way possible.
- Regularly maintained clothing presentations throughout the store.
- Assisted the stock room team with handling incoming shipments and organising the inventory.

WORK EXPERIENCE

Brand Representative (Part-time)
Abercrombie & Fitch Co.

08/2016 - 08/2017   *Amsterdam, the Netherlands*

Achievements/Tasks

- Helped customers with their shopping needs and assisted them in any way possible.
- Regularly maintained clothing presentations throughout the store.
- Assisted the stock room team with handling incoming shipments and organising the inventory.

EDUCATION

Web Development Bootcamp
Ironhack

10/2023 - 12/2023   *Amsterdam, the Netherlands*

Courses

- A 10-week, full-time (400+ hours) bootcamp that covers the fundamentals of Web Development. The bootcamp is divided into 3 modules.
- Module 1: HTML, CSS, and Javascript with a final project => Create a game using OOP.
- Module 2: React and APIs with a final project => Create a Single Page Application using React.js and an API.
- Module 3: MERN Stack, REST APIs, and Token-Based Authentication with a final project => Create a Full-Stack Application using the MERN Stack.

M.Sc. Sustainable Finance
Maastricht University School of Business and Economics

09/2021 - 08/2022   *Maastricht, the Netherlands*

Courses

- Data Analytics, Sustainable Finance, Management and Strategy, Institutional Investors, Financial Statement Analysis and Valuation, Sustainable and Responsible Investments, and Real Estate Finance.

B.Sc. Economics and Business Economics
Maastricht University School of Business and Economics

09/2017 - 07/2020   *Maastricht, the Netherlands*

Courses

- Marketing, Supply Chain, Accounting, Finance, Banking, International Business Strategy, Project Management, Process Management, and Technology and Innovation Management.

PROJECTS

Ring-A-Show
- https://ring-a-show.netlify.app/.
- A single-page application that allows you to book artists for small gigs at home or at a specified location. The app is easy to use and works similar to a food delivery app. Just browse through our list of artists and their performances and book your favourite artist.
- Stack: ReactJS, NodeJS, Express, CSS, REST API, MongoDB, and Token-based Authentication.

ESG Tracker
- https://esg-tracker.netlify.app/.
- A single-page application for investors, regulators, and individuals to explore companies' ESG and other relevant data. From their perspective, they can see important information such as ESG scores, the country they are located in, the industry they are active in and their market capitalization.
- Stack: ReactJS, CSS, MongoDB, and REST API.

Formula Revenge Game
- https://jaimeilustre.github.io/Project-1/.
- A game where a player can control the car using the arrow keys and shoot incoming obstacles with an automatic shooting system. Each obstacle destroyed garners the player 25 points.
- Stack: JavaScript, HTML, CSS, and DOM Manipulation.
